General information

This document contains information on all countries that are members of CEPT, as well as countries that are not members of CEPT but have implemented at least one of the ECC recommendations for amateur radio.

The “CEPT Licence” as well as the “CEPT Novice Licence” make it possible for radio amateurs from CEPT countries to operate during short visits of up to three months in other CEPT countries without the requirement of obtaining an individual temporary licence from the visited CEPT country.

There are two ECC recommendations for this purpose. The “**CEPT Licence**” is described in **ECC Recommendation T/R 61-01** [1], whereas the “**CEPT Novice Licence**” follows **ECC Recommendation ECC/REC/(05)06** [2]. These recommendations have to be implemented within the national law in a country before accepting operation under the CEPT regulation.

A “Harmonized Amateur Radio Examination Certificate” (**HAREC**) according to **ECC Recommendation T/R 61-02** [3] shows proof of successfully passing an amateur radio examination which complies with the Examination Syllabus for the HAREC. It thus facilitates the issue of an individual licence to radio amateurs who stay in a country for a longer term than that mentioned in ECC Recommendation T/R 61-01. It also eases the issue of an individual licence to a radio amateur returning to his native country showing the “HAREC” Certificate issued by a foreign administration.

The syllabus for the “CEPT Novice Licence” is described in **ERC Report 32** [4].

To facilitate the introduction of a third level, the “Entry Class”, in countries, the corresponding syllabus is described in **ECC Report 89** [5]. However, there is currently no ECC recommendation aiming at the mutual recognition of “Entry Class” licences.

To operate under the CEPT regulation, you need to have your own licence document with you. It is also advisable to carry a copy of the licensing regulations in your own country and a copy of the licensing regulations in the foreign country with you as well as a printout of the applicable ECC recommendation.

This list has been compiled according to official documents. No responsibility is taken for the correctness of this information.

Comments and corrections are very much appreciated: dk5ji(at)darc.de.

Notes

- ¹ T/R 61-01 implemented according to CEPT, but implementation questioned by Peruvian authorities; guest licence required
- ² According to T/R 61-01, the letters OA followed by a number indicating the zone in Peru from which the station is operated form a suffix to the national call sign of the operator. The national amateur radio regulations [2] stipulate that this combination is used as a prefix to the foreigner's call sign.

Notes

- ¹ OM9/ according to the List of CEPT Countries (T/R 61-01, Annex 2, and ECC/REC/(05)06, Annex 2), but OM/ according to the national amateur radio regulations [1]
- ² The national amateur radio regulations [1] do not contain any definition regarding Classes E and N in terms of frequency ranges and power classes. In an announcement dated 2022-08-31 (<http://www.hamradio.sk/>), the national Slovak amateur radio club Slovenský zväz rádioamatérov (SZR) recommended to adhere to the power limits that had been implemented before the new regulation came into force. In another announcement dated 2023-02-15, the SZR described the administrative procedure, by which new amateur radio permits are now being issued that indicate the maximum power according to the licence class.
- ³ Bandwidth and modes according to the IARU Region 1 band plan (please refer to the list at the end of this document)
- ⁴ Beacon stations, reception only
- ⁵ Satellite communication

- ¹ The implementation does not cover the British Overseas Territories (VP2, VP5, VP6, VP8, VP9, VPØ, VQ9, ZB2, ZC4, ZD7, ZD8, ZD9).
- ² The combination of the letter “M” and a second letter – the so-called Regional Secondary Letter (RSL) denoting a part of the UK or a Crown Dependency – only refers to foreigners visiting the UK. As of February 2024, Ofcom has made the use of RSLs optional for amateur radio licencees coming from the British islands and using callsigns with “G” and “M”. At the same time, the RSL “E” was introduced for optional use by radio amateurs in England. When operating in another country, these RSLs shall be omitted. [1]

Notes

¹ Citizenship of the state outside the US that has issued the national licence is required

² In a letter to the DARC dated June 3, 2008, the FCC confirms this equivalence: "As the phrase 'a CEPT radio-amateur license' is

used in Part 97, it includes all categories of CEPT radio-amateur licenses. In that the CEPT category 'Novice' is a CEPT license, our rules authorize these license holders the frequency privileges we authorize our Amateur Extra Class licensees." For US citizens, Amateur Extra and Advanced Classes are equivalent to the CEPT Licence, whereas the General Class is equivalent to the CEPT Novice Licence.

³ Country included in the List of non-CEPT Countries (T/R 61-01, Annex 4), but guest licence and landing permission required

⁴ Notification to the Utilities Telecom Council (UTC) is required 30 days prior to commencement of operations (<https://utc.org/plc-database-amateur-notification-process/>).

⁵ 1 W EIRP in Alaska within 800 km (496 miles) from Russia

⁶ 150HA1A, 60H0J2B, 2K80J2D, 2K80J3E only; CW and data modes must be centered 1.5 kHz above the channel frequencies

⁷ Phone and image only south of 20° N and west of 130° W

⁸ 30 days prior to any amateur radio operation on 1.25 m, a written notification to the ARRL (address see above) is required indicating the location.

⁹ 420.000–430.000 MHz: regional restrictions

¹⁰ 50 W PEP in restricted areas

¹¹ Regional restrictions in Colorado, New Mexico, Texas, Wyoming

¹² 50 W PEP within 150 miles (241 km) of the boundaries of the White Sands Missile Range, Texas/New Mexico (between 34° 30' N and 31° 41' N, 107° 30' W and 104° 11' W)

¹³ "Stations in the amateur service may continue to operate in the band 3300-3450 MHz on a secondary basis while the band's future uses are finalized, but stations in the amateur service may be required to cease operations in the band 3300-3450 MHz at any time if the amateur service causes harmful interference to flexible-use operations." [4]

¹⁴ Amateur operation on 76-77 GHz has been suspended till the FCC can determine that interference will not be caused to vehicle radar systems.
